

# Bowline

## Demineralized Bone Matrix

Promote bone growth with natural, bone morphogenetic proteins.

The **Bowline Demineralized Bone Matrix (DBM)** contains natural bone morphogenetic proteins (BMPs), including BMP-2 and BMP-7, which stimulate the production of new bone. Formats, including DBM Putty and Crunch Putty, double as a scaffold for new bone growth. Bowline DBM is intended for use as filler for bony defects, and is commonly used in trauma, orthopedic, and spine procedures.

### KEY BENEFITS

- 100% bone formulation with no synthetic carriers
- Format options include DBM Putty and Crunch Putty
- Easy-to-use formulation resists dilution with irrigation
- Osteoinductive potential
- Storage at room temperature

DBM Putty	Crunch Putty	Size
TTB01P	TTB01C	1 cc
TTB02P	TTB02C	2.5 cc
TTB05P	TTB05C	5 cc
TTB10P	TTB10C	10 cc
