

there's strength
in numbers...

artacent
ac amnion | chorion | amnion

3x stronger, **2x** thicker,*
3-layer, easy-to-use graft

Introducing **Artacent AC**[®], a new tri-layer graft from **Tides Medical**[®] that's three times stronger and two times thicker than traditional dual-layer grafts.

This thicker allograft is easier to handle and position effectively on the wound site. Because Artacent AC is stronger, it's less likely to rip or tear while being applied. Like Tides' other Artacent products, Artacent AC comes with our expert service and support so that you can focus on what you do best.

tidesmedical[®]
advanced products. expert service.

INCREDIBLY VERSATILE
WOUND COVERING FOR
PATIENTS WITH:

- Diabetic Ulcers
- Pressure Ulcers
- Venous Stasis Ulcers
- Burns
- Mohs Procedures

artacent

ac amnion | chorion | amnion

Artacent AC's tri-layer (amnion-chorion-amnion) structure

gives it three times the strength for easier handling and wound-site positioning. It is minimally processed using Tides Medical's proprietary Artacleanse® process: strong enough to make a graft safe for implantation, but gentle enough to maintain the natural biologic factors.

Artacent AC is...

STRONG: Minimal processing retains higher molecular weight of hyaluronic acid (HA), maintaining structural tissue strength.

EASY-TO-USE: Can be applied on either side, remains in place, and doesn't require sutures.

FLEXIBLE: Stores dry at room temperature for up to 5 years from date of manufacturing.

REIMBURSEABLE: Favorable customer programs, overnight shipping and expert support to help you navigate the complex reimbursement process.

Q Code: Q4190 Billing and Sizes:

#.	Size	Billing Units
1.	15 mm	2 part #ACA0015
2.	2x2 cm	4 part #ACA0202
3.	4x4 cm	16 part #ACA0404
4.	4x8 cm	32 part #ACA0408
